

Kilometer 0 Digital

Community digital movement

RECLAIM YOUR DIGITAL CONTROL

Why does KM0 exist?

A social and technological movement built by and for the community

A real alternative to Big Tech dependency

Open, local, and sustainable services, not just another provider

Real people behind the project, not an anonymous call centre

Business as usual vs. The KM0 proposal

The usual way

Your data as the product

Anonymous, distant support

Prices that do not reflect real costs

Total dependence on a few global providers

The KM0 proposal

Control and transparency over your data

Real people, close to you

Honest, sustainable pricing

An open community anyone can join

Movement principles

Open

Transparent

**Community-
driven**

Local

Returning digital control to people, families, associations, cooperatives, and schools.

KM0 Cloud, live in production

Cloud storage and collaboration like your own drive

Share files, sync, and work as a team

In-browser Office editing with Collabora Online (DOCX, XLSX, PPTX)

Access from web, Android, and iOS

URL: cloud.km0digital.com

Your data, your origin. The movement grows with you.

OpenCloud, the open platform

Open-source platform for files, sharing, and collaboration

Built by OpenCloud GmbH (Heinlein Group)

Digital sovereignty: no mandatory external cloud dependency

Go microservices architecture, no SQL database

KM0 runs OpenCloud 7.0.0 in production

Technical architecture

Debian 13 + Docker Compose on Hetzner servers (EU, Germany)

Nginx as sole HTTPS proxy; containers on loopback only

OpenCloud 7.0.0 · Dex OIDC · Collabora CODE · WOPI

Hybrid auth: Google, Apple, and local LDAP (IDM)

Let's Encrypt TLS · UFW + Fail2ban hardening

Unified authentication with Dex

Dex as central OIDC issuer for web, desktop, and mobile

Sign in with Google, Apple, or local OpenCloud credentials

KM0-branded login UI (CA | ES | EN | DE)

Native clients: OpenCloud Desktop, Android, and iOS

Trust and security

EU infrastructure (Falkenstein, Germany)

Operated by AMVARA CONSULTING S.L., ISO/IEC 27001:2022 certified

TLS-encrypted traffic · no selling data for advertising

Public technical blog: transparency from day zero

Documented backups and operational runbook

Project diary (Days 0–5)

- **Day 0** Server foundations: Debian, Docker, Nginx
- **Day 1** First OpenCloud deployment + KM0 web site
- **Day 2** Upgrade to OpenCloud 7 + Dex OIDC + backups
- **Day 3** km0digital.com domain + Collabora + multilingual FAQ
- **Day 4** Unified local LDAP login with OpenCloud IDM
- **Day 5** Vision meeting in Masnou: why and for whom

Competing without being Big Tech

Small teams with modern tools (including AI) can compete with large structures

Honest pricing based on real cost, not on monetising your data

Human support and proximity: meet in person if needed

Local = geographic (Barcelona/Masnou), operational, and already running
